Squalid

River

AOL BK  
River

Site is a built-up/urban area, picturesque but squalid, with many light-colored buildings, some tall & pointed; fountain & historical element play a role, but there is a sense of underlying tension & a military presence. Old & new seem to be mixed here; there is a definite religious component; there is much noisy, smelly traffic. Above site is a structure of interest with a series of arch shapes, enclosed courtyard(s), different levels, rounded ~~roofs~~ peaked shapes; cobblestone paving may be present. Area is very crowded.
